

Wheatland Center School
2019 SUMMER SCHOOL PROGRAM
(to be held at Wilmot High School)

June 17th - July 24th (Monday-Thursday)
8:00 AM - 12 Noon
(No School July 4th)

Catch Up! Keep Up! Get Ahead!

Welcome!! Wheatland's summer school program will be held at Wilmot High School this summer due to the construction on our school. All of the same fun and engaging summer school will be offered which makes summer school an excellent choice for your child, whether he/she is struggling in school, needs to keep in the routine over the summer, or excels academically. Please take a minute to look over the variety of classes that will be offered this summer and consider the many benefits of participating in summer school for your child.

Catch up: If your child is struggling to make academic progress, enrolling him or her in Wheatland's summer school program can provide your child with the attention he or she needs to catch up academically. Summer school offers a more relaxed learning environment that kids often react positively to, which can enhance their overall learning experience.

Keep up: Many children forget some of what they learned in school during the long summer break. Summer school provides an opportunity for your child to retain all of the skills and concepts that were learned during the school year.

Get Ahead: Parents often choose to send their children to summer school programs to help them get ahead academically. Children receive more individualized instruction because of smaller class sizes, which can increase learning potential. A successful summer school experience can help boost your child's self-esteem and raise his or her personal and academic expectations. Also, be sure to check out the many enrichment classes that are offered during our summer program.

Summer School Important Information

Hours: The hours for summer school will be 8:00 AM - 12:00 PM.

Location: Due to the construction at Wheatland Center School, summer school classes will be held at Wilmot High School.

Classes: A class may be cancelled if less than 10 students are enrolled. Some students will be required to participate in summer school in order to be promoted. Although these students will receive priority, students who want to attend for review are welcome to enroll. Enrichment classes will be filled on a first-come, first-served basis. Each student will receive a schedule of his/her classes prior to the first day of school.

Attendance: Regular attendance is expected. If your child will be absent for any reason, please let the office know ahead of time.

Busing: Each student will receive the bus routes with approximate pick-up and drop-off times with the class schedule. *Please note: To ensure a bus stop at your address, registration must be submitted by Friday, May 24, 2019.*

Discipline: Appropriate student behavior is expected. If a student's behavior makes it difficult for others to learn or for teachers to teach, we reserve the right to discuss the situation with the student and parent/guardian. If a remedy cannot be achieved, the student will be dismissed from the program with no refund given.

Morning Snack: Students should be sure to eat breakfast before coming to summer school each morning. A mid-morning snack will be provided in the classroom for all students.

Fees:

- There is a \$10.00 fee to cover the cost of consumable materials for the following classes:
 - o Arts and Crafts
 - o Cooking
 - o Engineering
 - o Backyard Science
 - o Makerspace
- For students that do not live in the Wheatland School District and are not enrolled at Wheatland, there is an additional \$25.00 fee per class (\$100.00 for Getting Ready for Kindergarten/First Grade).

Summer School Course Descriptions

Getting Ready for Kindergarten: Students who will be entering kindergarten in the fall may enroll in this class. This is a class that will last the entire morning from 8:00-12:00. Students will become familiar with their new surroundings while focusing on kindergarten-readiness skills such as oral language development, basic letter and number recognition, fine-motor skills, ability to listen, enthusiasm for learning, desire to be independent, and ability to play well with others.

Getting Ready for First Grade: Students who will be entering first grade in the fall may attend this class. This is a class that will last the entire morning from 8:00-12:00. Kindergarten skills will be reviewed and reinforced to help students make an easy transition to first grade.

Arts and Crafts: Students who will be entering grades 2-8 in the fall may enroll in this class. Students will be busy painting, gluing, cutting, and sculpting to create a wide variety of art projects. These classes will be designed for the various age groups and highlight different media and subjects. (**\$10.00 fee for consumable materials**).

At the Movies: Students who will be entering grades 4-8 in the fall may enroll in this class. If you love movies, this is the class for you! Students will take on the role of a movie critic as they evaluate and analyze popular films. The filmmaking process and the artistic elements directors and filmmakers made creating the movie will be examined. Students will also analyze various literary devices, character traits, settings, and themes found throughout a variety of movies.

Backyard Science: Students who will be entering grades 2-3 in the fall may enroll in this class. Science is all around us—even in our own backyards. Students will investigate the great outdoors through a variety of nature activities and experiments and also tend to our school garden. There is a whole lot of science outside just waiting to be explored. (**\$10.00 fee for consumable materials**).

Band: Students who will be entering grades 4-8 in the fall may enroll in this class. **Fourth and fifth** grade students (Introduction to Band) will be introduced to several musical instruments and reading music. Students in **sixth through eighth** grade will continue to practice and refine their instrumental skills over the summer.

Coding Adventure: Students who will be entering grades 2-5 in the fall may enroll in this class. Coding has become a fundamental skill. Students will explore a variety of free websites that teach kids programming which will jump-start them on a coding adventure.

Computer Coding and Creations: Students entering grades 6-8 in the fall may enroll in this class. Students will create using video, animation, music, and other media and will have the opportunity to create their own games and animations using simplified coding methods. This class will emphasize creation through technology.

Cooking: Students who will be entering grades 2-8 in the fall may enroll in this class. If you like to cook and eat, then this is the class for you. Students will learn a variety of cooking skills in a fun atmosphere with other kids who like to cook. Hands-on cooking lessons will be combined with wholesome, creative recipes. Summer school never tasted better! (**\$10.00 fee for consumable materials**).

Engineering (Engineering is Elementary/Junior Engineers): Students who will be entering grades 2-8 in the fall may enroll in the engineering classes. These classes will inspire children to build on their natural curiosity as they discover engineering concepts through experiments and hands-on learning. (**\$10.00 fee for consumable materials**).

Games Galore: Students who will be entering grades 2-8 in the fall may enroll in this class. In this interactive class, students will have the chance to learn and play many different board games, card games, and more. The fundamental steps of each game will be explained as students focus on teamwork, problem solving, following directions, and logical reasoning. Once you get started, you won't want to stop!

Jazz Ensemble: Students who will be entering grades 6-8 in the fall may enroll in this class. Students will learn different styles of "Big Band" music, develop their performance skills, and learn the fundamentals of improvisation.

Makerspace—Creative Exploration: Students who will be entering grades 4-8 in the fall may enroll in this class. Students will use science, technology, math, and engineering (STEM) to create, design, and build multiple hands-on projects. (**\$10.00 fee for consumable materials**).

Math Boost: Students who will be entering grades 2-8 in the fall may enroll in this class. Games, hands-on activities, problem solving, and supplemental materials will be incorporated in this class to help reinforce basic math skills.

Minecraft : Students entering grades 2-8 in the fall may enroll in this class. Minecraft is a popular online simulation software program. This student-driven class will teach students how to use and play Minecraft. Using this software tool, students will also explore concepts such as online collaboration, problem solving, programming, and web server setup.

NEW! Music Moguls: Students entering grades 4-8 in the fall may enroll in this class. Become a music mogul and create your own music! In this class, students will use technology in a hands-on environment to create and capture rhythms, melodies, and harmonies, and then use programs such as Audacity and Incredibox to manipulate, edit, and produce musical masterpieces.

Photography: Students who will be entering grades 4-8 in the fall may enroll in this class. A picture is worth a thousand words. Come learn the basics of photography as well as some cool tricks to make your photos come to life. Learn how to take great digital photos and the skills needed to enhance your images.

Reading Boost: Students who will be entering grades 2-8 in the fall may enroll in this class. This course will equip students with basic reading strategies to help improve their comprehension. Writing skills will also be incorporated in this course. This is an excellent opportunity for students to maintain and improve their reading skills over the summer.

LEGO Robotics: Students who will be entering grades 2-8 in the fall may enroll in this class. Students will build and program their own robotic creations while learning about simple machines, programming, engineering, and so much more.

Short Films and Animation: Students who are entering grades 2-5 in the fall may enroll in this class. Pixar short films are bound to brighten anybody's day. Students will not only enjoy watching Pixar's collection of short films, but they will also discover the process of bringing short stories and characters to life. A variety of writing and reading strategies will be incorporated into this class.

Summer Fitness and Recreation: Students who will be entering grades 2-3 in the fall may enroll in this class. This course will help students develop or improve their physical skills as well as learn good sportsmanship and the spirit of team games.

Team Sports--Skills Camp: Students who will be entering grades 4-8 in the fall may enroll in this class. This class will give student athletes an opportunity to learn fundamentals, proper techniques, and basic strategies used in team sports. Along with skill development, students will also focus on improving speed, strength, endurance, agility, and self-confidence.
